product overview

The Queensland Fire and Emergency Services (QFES) in partnership with our production company, Concept Safety Systems can arrange for the full production of professionally designed, site-specific, A3 size evacuation signs.

The evacuation signs are designed to ensure compliance with the Building Fire Safety Regulation 2008. The evacuation sign comprises of the evacuation procedures and the evacuation diagram for the building. The following site-specific information is included in the evacuation diagram:

- Exit signs and exits
- Exit routes to assembly areas
- Manually operated fire alarms
- Intercommunication devices
- Fire fighting equipment
- “You are here” references

As part of the production process a qualified consultant will visit your site and recommend the correct location and number of signs for your building. The evacuation signs are supplied in acrylic frames designed to be securely fixed to a wall or door.

To obtain a quote for this service, current building floor plans are required. Please contact Queensland Fire and Emergency Services - Training and Emergency Management for further information on 1300 650 028 or email tem@qfes.qld.gov.au
